

BAE-495 M
Introduction to Ecological Engineering
Thursdays 11:20 am-1:10 pm
8- week course beginning September 6th
Instructors: Dr. Jennings, Dr. Hunt and Dr. Burchell

This one hour special topics course will explore Ecological Engineering processes and applications, including stream restoration, biological stormwater management, and wetland restoration. Students will receive a broad experience into the practical application of these topics based on the actual research experience and field implementation of the instructors.
